

The Gill Taylors

Tarra, Milo, Maya, Isobel, and Tarra with Kate and Ravi

Isobel completed a Steiner Education Degree, followed by a Masters in Therapeutic Education. For 6 years she enjoyed working at Ruskin Mill in various different caring and administrative roles. For the past year she has been completing a Postgraduate Diploma in Systemic Family Psychotherapy, in which she has achieved a distinction, while volunteering with two charities in London; the Listening Place, learning how to listen to those at risk of suicide, and a refugee charity working with families.

At the moment she is about to start a new job working with youths in Social Services in Bristol and will continue to volunteer with The Listening Place - with those at risk of suicide. Next year she hopes to follow with a Masters in Family Psychotherapy.

She loves all her work – and still continues to play her violin.

Maya took a degree and a Masters in Ocean Sciences. Now she teaches the Sciences in a Secondary School in Conway, North Wales, inspiring teenagers to love Biology, Physics and Chemistry up to GCSE and Biology to 'A' level.

Milo, Isobel, Tarra and Maya

Tarra completed a degree in Biology last year and, wanting to experience life in a hospital he is currently working as a Health Care Assistant in Southampton. He has a place at Manchester University to study Medicine in September. He is the National Match Racing Sailing Champion and continues to sail as much as he is able to.

All three got high 2:1s in their degrees.

Milo has just achieved 3 A stars in his 'A' levels in Physics, Chemistry and Maths and will be taking a place at Cambridge University to study Physical Natural Sciences in September. He won the Science Shield at Ringwood School, as well as the Chemistry and Maths prizes for his year. He still loves sailing Laser Dinghies, watching rugby and playing the piano.
